This publication is prepared for the use of US Government officials, and the format, coverage, and content are designed to meet their specific requirements. US Government officials may obtain additional copies of this document directly or through liaison channels from the Central Intelligence Agency.

Requesters outside the US Government may obtain subscriptions to CIA publications similar to this one by addressing inquiries to:

Document Expediting (DOCEX) Project
Exchange and Gift Division
Library of Congress
Washington, D.C. 20540

or: **National Technical Information Service**
5285 Port Royal Road
Springfield, VA 22161

Requesters outside the US Government not interested in subscription service may purchase specific publications either in paper copy or microform from:

Photoduplication Service
Library of Congress
Washington, D.C. 20540

or: **National Technical Information Service**
5285 Port Royal Road
Springfield, VA 22161
(To expedite service call the
NTIS Order Desk (703) 487-4650)

Comments and queries on this paper may be directed to the DOCEX Project at the above address or by phone (202-287-9527), or the NTIS Office of Customer Services at the above address or by phone (703-487-4660). Publications are not available to the public from the Central Intelligence Agency.

This publication may also be purchased from:

Handbook of Economic Statistics, 1986

A Reference Aid

*Research for this report was completed
on 1 August 1986.*

CPAS 86-10002
September 1986

Handbook of Economic Statistics, 1986

Purpose and Scope

The *Handbook of Economic Statistics, 1986*, provides statistics for selected non-Communist countries and all the Communist countries.

In general, the data in the *Handbook* are for 1960, 1970, 1975, and 1980-85. Data for the Communist and non-Communist countries have been adjusted, when necessary, to achieve comparability and therefore may differ from data presented in the original sources. Footnotes have been used liberally to give definitions, exceptions, and methodology. The base year for average annual rates of growth is the year prior to the stated period.

Rounding of the Totals

The totals have been rounded, with some exceptions, to three significant digits. Because of rounding, components may not add to the totals shown. Totals are not presented if missing data are believed to represent a significant part of the total. In general, zeros appearing after the last nonzero number following the decimal point are not significant but are used merely for consistency in presentation.

Symbols

The abbreviation NA (*not available*) is used when information about the existence of the data or the magnitude of the data is not available, and the abbreviation NEGL (*negligible*) is used when the magnitude of the data is less than one-half of the final unit employed for each table.

Sources

The data given for the most recent years are frequently preliminary and subject to revision. The data for the Communist countries are official data from the country cited, CIA estimates, or estimates made by other organizations. The data for the non-Communist countries are from publications of the United Nations, the Organization for Economic Cooperation and Development (OECD), publications of US Government agencies, unclassified publications of other international organizations or individual countries, or are estimates of this Office.

Terms

Unless otherwise indicated, the term *Communist Countries* includes the USSR, the countries of Eastern Europe, China, Albania, Cambodia, Cuba, Laos, North Korea, Vietnam, and Yugoslavia; the term *Eastern Europe* includes Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Romania. The term *European Community* includes Belgium, Denmark, France, Greece, Ireland, Italy, Luxembourg, the Netherlands, the United Kingdom, and West Germany. The term *developed countries* includes the European Community, Austria, Finland, Iceland, Israel, Liechtenstein, Portugal, Malta, Norway, Spain, Sweden, Switzerland, Turkey, Australia, Canada, Japan, New Zealand, the Republic of South Africa, and the United States. The term *Organization for Economic Cooperation and Development (OECD)* includes all the developed countries, except Liechtenstein, Malta, Israel, and the Republic of South Africa.

The Big Six includes Canada, France, Italy, Japan, the United Kingdom, and West Germany. The Big Seven includes the United States and the Big Six.

Except for economic aid data, the term *less developed countries* includes the following:

- All independent countries of Africa except the Republic of South Africa.
 - All independent countries of East Asia except Japan.
 - All independent countries in Latin America except Cuba.
 - All independent countries in the Middle East and South Asia, except Israel and Turkey.
- Except for Cyprus, no country in either Eastern or Western Europe is in the LDC grouping. Except for Hong Kong, no territory that is a possession, trust, or protectorate is included in the LDC grouping.

The definition of *less developed countries* for economic aid conforms to that used by the Development Assistance Committee (DAC) of the OECD and other aid agencies and includes the following non-Communist countries:

- All independent countries of Africa except the Republic of South Africa.
- All countries of East Asia except Hong Kong and Japan.
- Malta, Portugal, and Spain in Europe.
- All independent countries in Latin America, except Cuba.
- All countries in the Middle East and South Asia.

Totals for the country groupings may or may not include all of the countries listed above, depending on the commodity or services listed.

Figure 14
Measures of Energy Efficiency^a

^aCare should be taken in comparing the Soviet oil-to-GNP ratio directly with the ratio of Western countries. The Soviet series is based on apparent oil consumption because the Soviets do not publish data on oil consumption. The apparent consumption series does not take into consideration possible changes in year-to-year oil stock levels and is based on reported oil production and estimates of oil exports and imports.

^a Data for the non-Communist countries were converted from national currencies by using the 1985 Par Rate/Market Rate factors. Developed country data are from OECD sources.

^b The estimate of Soviet GNP presented here is expressed in "geometric mean dollars," which are derived by applying an average of the US- and Soviet-weighted purchasing power parity ratios to an estimate of Soviet GNP in rubles. As a result, geometric mean dollars are neither dollars nor rubles, but a mix of the two. They approximate an estimate falling midway between a comparison of the Soviet Union and the United States in dollars and one in rubles. The purchasing

power parity ratios used in this estimate are based on a study in 1976 dollar prices. The US GNP implicit price deflator rebased to 1985 was used to convert Soviet GNP to 1985 dollars.

^c The GNP estimates for Eastern Europe and Yugoslavia are not comparable to those for the non-Communist countries in this table. Comparable non-Communist country GNP estimates are in Table 10, the first column marked "Purchasing Power Equivalents (Kravis)." GNP estimates for Hungary, Poland, and Romania are based on benchmark figures for 1975 in 1975 dollars in Kravis, Heston, and Summers, *World Product and Income: International Com-*

parisons of Real Gross Product, Baltimore: Johns Hopkins University Press, 1982. GNP indices in constant domestic currencies derived from official data were combined with the 1975 benchmarks to yield time series in 1975 dollars. The US GNP deflator was then applied to the series to convert 1975 dollars into 1985 dollars. For Bulgaria, Czechoslovakia, East Germany, and Yugoslavia, 1970 benchmarks were shifted to 1975 in proportion to the geometric mean of the benchmark shifts for Hungary, Poland, and Romania. The 1970 benchmarks were taken from *UN Economic Bulletin for Europe*, Vol. 31, No. 2, 1980.

^a For the individual OECD countries, the ratios for converting GDP in national currencies at 1985 prices into 1985 US dollars on the basis of purchasing power equivalents are derived from the 1975 ratios in *World Product and Income: International Comparisons of Real GDP*, published for the World Bank by the Johns Hopkins University Press, Baltimore and London, 1981, using the geometric mean of foreign and US weighted ratios. These 1975 GDP parities were moved to 1985 by applying the following factor: the derived price index for each OECD country for 1976-85 divided by a derived price index for the United States for 1976-85. These price indexes were derived for each country by dividing the growth of GDP in current prices by the growth of GDP in constant prices. The ratios thus obtained were applied to the GDP values, given in the national currencies in 1985 prices.

^b For the individual European OECD countries, the ratios for converting GDP in national currencies at 1985 prices into 1985 US dollars on the basis of US purchasing power equivalents are derived from the 1950 ratios in Milton Gilbert and Associates, *Comparative National Products and Price Levels*, OEEC, Paris, 1958, using the geometric mean

of European and US weighted ratios. These 1950 ratios were moved to 1985 by applying the following factor: the derived price index for each European country for 1951-85 divided by a derived price index for the United States for 1951-85. The ratios thus obtained were applied to the GDP values, given in the national currencies in 1985 prices.

					41.0
					94.8

^a A generally preferred procedure for making international economic comparisons is to convert each country's GNP to the currency of the other. Two comparisons can then be made, one in rubles and one in dollars. The two comparisons will yield different answers. This phenomenon is commonly known as the "index number problem," and it results from differences in the relative price and quantity structures found in each country. Goods produced in relatively large quantities in either country tend to sell at relatively low prices in that country, and vice versa. Soviet GNP is, therefore, a larger share of US GNP when comparisons are made in dollars since dollars place a greater weight than ruble prices do on investment and defense goods, which account for larger shares of output in the Soviet Union than in the United States.

The important point about index numbers is that valuations in either rubles or dollars are equally correct. When a single estimate is required, economists by convention often resort to the geometric mean of the two as a reasonable point estimate that falls between the ruble and dollar comparisons.

The geometric mean comparison is presented here, although the reader is cautioned that it is used for its presentational convenience and does not, strictly speaking, represent a more valid result than that presented in either currency.

The estimate of Soviet GNP in dollars presented here is not consistent with that given in Table 8, which is expressed in "geometric mean dollars" for consistency with the other data in that table. The approach used in this table, however, is theoretically preferable.

This comparison is based on GNP accounts in 1970 rubles and 1972 dollars rebased to 1976 dollars. Accounts based on 1982 prices are available for both countries, but work necessary to reflect these new prices in the comparisons is not yet complete.

^b The above Soviet GNP data in established prices should not be used in conjunction with Soviet foreign trade data appearing in Tables 63-65. These latter tables use official foreign exchange rates to derive dollar values for trade; we have yet to estimate the value of Soviet foreign trade in terms of actual purchasing power, which would allow for an estimate of the share of foreign trade in Soviet national income.

The magnitudes for the Soviet end-use components were calculated to measure value of output compared with the United States but not the cost in resources. The share of total economic resources devoted to a particular end use (such as defense) or the share of total output originating in an individual sector (for example, agriculture or industry) in the USSR should be measured in internal ruble prices and costs.

The identified end uses of GNP are defined as follows:
(1) Consumption includes personal expenditures for goods and services for all purposes and noninvestment outlays by government for goods and services for health and education.
(2) New fixed investment is defined as the sum of expenditures for gross private domestic investment net of inventories; for public construction other than that for military facilities; and for equipment purchased by the government except that for defense. Since part of new fixed investment in the United States is capital repair, one-half of Soviet expenditures on capital repair is included in Soviet new fixed investment.

Other uses of GNP include defense, space, research and development, inventory change, administration, net exports, and a statistical discrepancy. The total value for these expenditures cannot be derived for the USSR by subtraction, however.

^a Preliminary.

^b The official indexes purportedly measure changes in the gross value of industrial production. In general, the gross value of production equals the sum of the value of output of all industrial enterprises. As a result, since both intermediate and final goods are included in the value of output of each enterprise, industrial products are double counted. For example, steel used in producing automobiles is counted in the value of both steel output and automobile output. In

addition to overstatement in the official indicator from this source, disguised inflation also enters the index through new-product pricing, where minor product improvements result in a new-product price that is substantially higher than can be justified by either improved quality or increased production costs. Because output of these "new" products grows from a small base, their rates of growth will proceed at a higher rate than those of "old" products.

Adjusted indexes of industrial production—parallel to

those used by the Federal Reserve Board for measuring US industrial output—are constructed in order to circumvent most of these distortions, that is, price-weighted samples of products form output indexes for various industrial components and these component indexes are combined into an aggregate index for industry by use of 1982 value-added weights.

^c An adjusted index is not available.

^a Indexes for the non-Communist countries are value-added weighted indexes of intermediate and final products of industry. Industry includes manufacturing, mining, and, in most countries, public utilities. The indexes for the Communist countries are estimates of CIA (see Table 17 for detailed explanation)—constructed as nearly as possible on the same basis as the indexes for Western countries—or other calculations accepted by CIA. The indexes for the Communist countries include manufacturing, mining, and public utilities.

^b Preliminary.

^c Index of gross values of output for individual commodities and branches are aggregated by 1982 value-added weights. The three sectors covered—materials, machinery, and non-durable consumer goods—constitute 50 percent, 33 percent, and 17 percent, respectively, of the value-added weights for industrial production. This index is as comparable as data will permit with the index of US industrial production of the US Federal Reserve Board.

^d CIA estimates for 1960-75 were computed by applying value-added weights to data for commodity production. The data are fragmentary and uncertain; therefore, the index should be regarded as providing only a tentative indication of the general level and trend in production. The index for 1980-85 follows the trend for reported gross value of industrial output.

^a Except for the United States, data are from the United States Arms Control and Disarmament Agency, *World Military Expenditures and Arms Transfers*, based on the ratio of military expenditures to GNP at current market prices. Military expenditures are for current and capital expenditures to meet the needs of the armed forces, including expenditures of national defense agencies for military programs; expenditures for the military components of such mixed activities as atomic energy, space, and research and development; military assistance to foreign countries; and expenditures on paramilitary forces where they contribute substantially to a country's military capabilities.

^a Implicit price index obtained from a comparison of indexes of goods sold in the retail trade network in constant and in current prices. The current price index is based on the values of total retail and collective farm market sales in current prices regularly published in Soviet statistical abstracts. The index in constant 1982 prices is derived from the goods components of the CIA index of total consumption. A more complete explanation of the methodology and a discussion of the relative merits of an "official" or "alternative" price index are contained in "Soviet Economy in a New Perspective," US Congress, Joint Economic Committee, 14 October 1976, p. 631.

^b Calculated differently from that for the USSR; the official index of personal consumption in current prices was deflated by a calculated index of personal consumption in constant prices. An explanation of the methodology is presented in Thad P. Alton, Gregor Lazarek, Elizabeth M. Bass, and Wassyl Znayenko, "Official and Alternative Consumer

Price Indexes in Eastern Europe: Selected Years, 1960-81," *Occasional Paper No. 73 of the Research Project on National Income in East Central Europe* (NY: L. W. International Financial Research, Inc., 1982).

^c Cost-of-living index for workers and staff members. Chinese official statistics.

^a Average exchange rate for the year. Some countries also have special exchange rates for noncommercial transactions, such as diplomatic, tourist, and student expenditures and for personal remittances.

^b The unofficial rates actually used in East German accounting of foreign trade transactions. East Germany maintains that an East German mark is equivalent to a West German mark.

^c Since January 1976, Hungary has expressed the value of its foreign trade in domestic forints rather than diviza forints.

^d End of year rate. Noncommercial rate through 1977. Data for 1979-82 are estimated.

A useful starting point for analyzing the 1986-90 plan for the USSR is to compare it with earlier five-year plans and results. If official Soviet measures of actual growth are used in such comparisons, however, the extent of plan fulfillment is exaggerated. These measures are subject to upward bias because of hidden inflation and double counting—problems that appear not to affect plan figures.¹ CIA estimates of Soviet economic growth correct for this upward bias and, therefore, are

better suited than official statistics for comparisons with planned growth.

¹ For discussion of these problems, see Joint Economic Committee, Congress of the United States, *USSR: Measures of Economic Growth and Development*, 1950-80 (Washington, US Government Printing Office, 1982), pp.v-vi, 12-13, 212-215, 278-281; and CIA, *Comparing Planned and Actual Growth of Industrial Output in Centrally Planned Economies*, ER 80-10461, August 1980.

Actual ^d	3.7	-0.4	1.0	2.0	NA

^a Weighted average of growth rates of gross value of output from official Soviet plans for industry, agriculture, and other major sectors of origin. Weights are CIA estimates of value added in these sectors.

^b CIA estimate (1982 sector-of-origin factor-cost weights).

^c Official Soviet plan for growth of gross value of output.

^d CIA estimate of output net of feed, seed, and waste (1982 value).

To circumvent problems with official Soviet measures of economic growth, CIA constructs synthetic estimates of gross national product (GNP) and its major components. Total GNP covers value added by primary inputs of labor and capital in sectors of origin, such as industry and agriculture. Unlike Soviet statistics, CIA estimates of GNP:

- Avoid much of the hidden inflation problem by using quantity data—mostly from Soviet sources—on output of individual products, valued at prices of a fixed base year.
- Include depreciation and services that do not contribute directly to output of material goods.
- Provide improved measures of resource allocation and of growth in the economy's production potential^a by adjusting valuation from official prices to factor cost.

CIA estimates for industry, like those of GNP, are corrected for hidden inflation in Soviet measures. Moreover, value-added weights for these estimates eliminate much of the double counting—present in official statistics on gross value of output—of inputs sold from one producer to another.

CIA estimates for agriculture, net output, exclude agriculture's use of its own products as inputs but includes inputs from industry and other sectors. For estimating value added, inputs from industry and other sectors are also subtracted. Soviet statistics on gross values of output reflect a good deal of double counting within agriculture, but hidden inflation is not a significant problem.

All GNP estimates in this edition of the *Handbook* are based on values at 1982 factor cost rather than the 1970 values reported previously.

Table 36
USSR: CIA and Official Soviet Measures of Economic Growth

	Average annual rate of growth							Percent	
	1966-70	1971-75	1976-80	1981	1982	1983	1984	1985

^a Because of the well-known difficulties in using Soviet established prices as a measure of resource burden, the shares of GNP in this table are based on GNP at factor cost. In calculating GNP at factor cost, 1982 end-use weights have been revised from an established price basis to a factor

cost basis by subtracting turnover taxes and profits and adding subsidies and implicit capital charges. These revised weights are then moved over time by indexes of the various end uses in constant prices.
^b Preliminary.

^c Including consumption of food, soft goods, durables, personal services, and personal and government outlays for education and health.

^d Including machinery and equipment, construction and other capital outlays, and net additions to livestock.

^a For computing average annual rates of growth, the base year is the year prior to the stated period.

^b Preliminary.

^c Based on indexes of GNP (1982 rubles), by sector of origin, at factor cost.

^d Inputs of workhours, capital, and land are combined using weights of 51.2 percent, 45.8 percent, 3.0 percent, respectively, in a Cobb-Douglas (linear homogeneous) production function. These weights represent the distribution of labor costs (wages, social insurance deductions and other income), capital costs (depreciation and a calculated capital charge), and land rent in 1982, the base year for all indexes underlying the growth rate calculations.

Table 44**USSR: Industrial Factor Productivity**

^a Including all countries trading with the Soviet Union on a hard currency basis as of 1 January 1980.

^b The importance of hard currency trade is overstated for exports and understated for imports in Soviet statistics because of the artificial prices the USSR uses in its CEMA country trade.

Table 47

1985	Exports Imports	6,521 8,616	5,788 7,237	NA NA	NA NA	733 1,379

^a Exports are on an f.o.b. basis; imports are on a c.i.f. basis. Cuban trade with non-Communist countries is based on hard currency world prices while its Communist country trade uses soft currency negotiated prices which are free-

market values. The result is a more favorable global trade balance than if Cuba conducted all of its trade at world market prices.

^b Including data for China, Mongolia, North Korea, and Vietnam.

Nickel ^d	345	40	30	35	15	-10	120	105	105	100

^a Based on official Cuban and Soviet trade data.^b Preliminary.^c Based on (a) estimated balance-of-payments aid necessary to cover Cuban trade deficits with the USSR; (b) Cuban purchases of capital goods from Moscow; and (c) public statements by Cuban and Soviet officials concerning the amount of development aid extended. This aid is repayable, but terms are highly concessional. Projection for 1984 is based on preliminary trade data.^d Sugar and nickel subsidies are estimated as the difference between the price Moscow pays for these commodities and their world market value. The difference is considered a grant and not subject to repayment.^e The petroleum subsidy reflects the difference between the value of petroleum purchased from the USSR and the value of these imports at world market prices. It is considered a grant and not subject to repayment.

^a The portion of total resources which has been assessed as being exploitable under local economic conditions and available technology.

^b Sources for Non-Communist countries: *Oil Energy Trends and Oil and Gas Journal*.

^c Yearend 1984. Data are expressed in terms of coal equivalent (7,000 kilocalories per kilogram) and include anthracite,

bituminous and subbituminous coal, and brown coal/lignite.

^d For comparability, US and Canadian crude oil reserves have been adjusted upward to include estimated NGL reserves.

^e The Soviets do not publish reserve statistics on oil. Most recent published US and Western European estimates fall within this range.

^a Data include only gas from natural gas wells and associated gas from petroleum fields.

^b Data are for net production—that is, for gas actually collected and utilized as fuel or raw material. They exclude gas used for reinjection, as well as gas flared, vented, or wasted, whether or not it has been processed for the extraction of natural gasoline.

^c Data for the United States are in terms of net marketed production. Data for the USSR refer to gross production less losses and waste. US gross production (less losses and waste), which includes gas reinjected in order to maintain reservoir pressure, would be as follows (in billion cubic feet):

1960 1965 1970 1973 1975 1979
14,510 17,660 23,790 24,065 21,105 21,885

1980 1981 1982 1983 1984
21,870 21,585 20,210 18,320 20,150

A much smaller share of total production in the USSR is believed to be used for reinjection.

^d Including gas used for repressuring and gas wasted.

^e Gross production.

^a Data are for total (gross) production at generating centers and therefore include transmission losses and station use (see footnote b).

^b Data are gross production or estimates of gross production based on reported net, adjusted by increasing by 7.5 percent the thermal electric production to include production that is consumed by the station itself. Hydroelectric production that is consumed by the station itself is a negligible part of the gross production. Therefore, no attempt has been made to adjust the net production for hydroelectric power.

^c Beginning in 1980, data are for public utilities only.

^a Unless otherwise indicated, data are for the gross amount of marketable iron ores in the state in which they leave the mines, including manganese ores but excluding pyrites.

^b The metal content of the ore in the OECD countries varies from year to year. The approximate current content is as follows: United Kingdom and West Germany, 28-31 percent; France, 32 percent; United States and Canada, 63-64 percent; and Australia and Sweden, 60-65 percent.

^c The metal content of the ore in the other countries ranges from 30 percent to 68 percent.

^d Final product. Data on gross amount of marketable ores not available.

Romania ^e									

^a Unless otherwise indicated, data are for steam and hydraulic turbines. Most production of turbines is for use in matched sets with generators for production of electricity. In addition, turbines are produced in single units for many purposes, including direct industrial drives, marine propulsion, and pipeline transmission.

^b Shipments of units of 4,000 kilowatts and larger. Data are

available only for turbines produced in integral units together with generators. Therefore, data for turbines and generators for the United States are assumed to be the same. Some turbines are produced in single units, but no data are available on this production.

^c Including a number of gas turbines.

^d Steam turbines only.

^e Steam turbines of more than 500 kilowatts only.

Table 142

Housing Construction

^a Data are for the following products, where they are produced: barley, corn, oats, rice, rye, sorghum, and wheat.

^b Including miscellaneous grains and pulses. Measured in bunker weight, that is, gross output from the combine which includes excess moisture, unripe and damaged kernels, weed seeds, and other trash. For comparison with US or other country grain output, an average discount of 11 percent should be applied.

^c United States Department of Agriculture estimates.

^d Including miscellaneous grains.

^e Including pulses.

^f Data reflect only rice production.

^g Including soybeans, broad beans, and field peas. Tubers are included on a grain equivalent basis of 5 metric tons of tubers to 1 metric ton of grain.

^h Data reflect only government collections of corn and rice; total production of grains is somewhat higher.

ⁱ Including corn, manioc, sweet potatoes, and soybeans on a paddy-equivalent basis (1 ton paddy = 0.63 tons of grain or rice).

^a Data are for the following products, where they are produced: barley, corn, oats, rye, and sorghum.

^b Excluding corn.

^c Unless otherwise indicated, data include miscellaneous grains.

^d Measured in bunker weight, that is, gross output from the combine, which includes excess moisture, unripe and damaged kernels, weed seeds, and other trash. For comparison with US or other country grain output, an average discount of 11 percent should be applied.

^e United States Department of Agriculture estimates. Excluding miscellaneous grains, which average about 8 million tons annually.

^f Corn only. Data reflect government collections only. Total production is somewhat higher.

^a Rough, or paddy, rice. Data refer to crops harvested in the last half of the year stated, combined with crops harvested in the first half of the following year.

^b US Department of Agriculture estimates.

^c Milled rice. Data reflect government collection only.

^d Prior to 1980, data for North Vietnam.

^a Unless otherwise indicated, data are for beet sugar produced in the calendar year. Data are given in terms of the raw value of centrifugal sugar. Refined sugar is equal to approximately 92 percent of raw sugar weight. Centrifugal, as distinguished from noncentrifugal, sugar includes cane

and beet sugar produced by the centrifugal process and is the principal type of sugar moving in international trade.

^b Including cane sugar.

^c Including Puerto Rico.

^d Cane sugar only.

^e Including raw cane sugar imported for refining.

^f White sugar equivalent.

^g Raw cane sugar of 96° polarization. Data are for crop years ending 30 June of the stated year.

^a Data are on a carcass weight, bone-in basis, and are for beef, veal, buffalo, pork, mutton, lamb, goat, and poultry where they are produced. Unless otherwise indicated, data exclude horsemeat, rabbit, game, edible offal, and lard.

^b Non-Communist country data include meat from animals imported for slaughter.

^c Including horsemeat.

^d Data are on a slaughter weight, bone-in basis, and include horsemeat, rabbit, game, edible offal, and slaughter fats in addition to the meats listed in footnote a above. Slaughter weight is roughly 3 percent less than carcass weight because it excludes kidney and leaf fat. As a result of this broader coverage, the meat production data for the USSR and Eastern Europe are above the level attained if the coverage was limited to that shown for other countries.

^e Data are for pork, beef, and mutton.

^f Data are for deboned beef, pig bellies, and fresh poultry for state production only.

^a Including land under temporary crops, gardens, fallow or idle land, and permanent crops such as orchards and vineyards, unless otherwise indicated.

^b Data are "fertilizer years"—in general, the year beginning 1 July.

^c Including phosphate rock; excluding livestock phosphates.

Data indicate the quantity supplied to agriculture.

^d Arable land is total area less pasture and hayland.

^e Sown area is used because of extensive multiple cropping.

^a Excluding urban systems: plantation, forest, mine, industrial plant, underground, funicular, and cable railroads; and short lines of little importance. Unless otherwise indicated, data are for the state or principal railroad system and include all goods and livestock carried during the calendar year and exclude service traffic, mail, and nonrevenue government stores. Freight traffic carried on more than one railroad line within a country is counted only once. Foreign

trade freight traffic carried through more than one country, however, is counted in each country. Data for the United States include express and mail and are specifically for revenue and nonrevenue freight traffic for a more realistic comparison with Soviet methods of reporting.

^b Including secondary or private railroads operating as common carriers.

^c Excluding livestock.

^d Excluding data for Northern Ireland.

^e Including mail and passenger baggage. Data are for the year beginning 1 April of the stated year.

^f Including service traffic.

^g Including Namibia.

^a Units of two, four, or more axles. Unless otherwise indicated, data refer to both state and private ownership of cars used on the state or principal railroad system. Data are as of the end of the year. Because of the lack of comparability in data, totals for the OECD and the Communist countries are omitted.

^b Units of four or more axles.

^c Including secondary or private railroads operating as common carriers.

^d Excluding privately owned tank cars and including data for Northern Ireland.

^e PKP railroad cars only.

^f The majority are four-axle units.

^a Ships of 1,000 gross register tons (GRT) or more. Data are as of the end of the year. Data for the non-Communist countries include all combination passenger and cargo ships, whereas, unless otherwise indicated, those for the Communist countries exclude passenger ships that have small cargo capacities.

^b Excluding ships operating only on the Great Lakes and US-owned ships flying the Liberian, Panamanian, and other "flags of convenience."

^c Excluding Greek-owned ships flying the Liberian, Panamanian, and other "flags of convenience."

^d Excluding the Caspian Sea Fleet passenger ships and vessels subordinate to the Ministry of the Fishing Industry.

^e Before August 1968, a few additional Bulgarian-owned ships were operated under the flags of non-Communist countries.

^f Until March 1967, an undetermined number of Czechoslovak-flag ships were jointly owned with China.

^g Including some ships flying the Polish flag but under the control of the Chinese-Polish Shipbrokers Corporation. At the end of 1985, there were 13 of these ships.

^h Data include a number of ships jointly owned by the Chinese-Albanian Joint Stock Shipping Company.

ⁱ Including North Korean and Vietnamese vessels.

^a Tankers and whaling tankers of 1,000 gross registered tons (GRT) or more. Data are as of the end of the year and include specialized oil and chemical tankers and some combination carriers (oil/dry bulk carriers). For the purposes of this table, the tonnage is converted to deadweight (DWT).

^b Excluding ships operating only on the Great Lakes and US-owned ships flying the Liberian, Panamanian, and other "flags of convenience."

^c Excluding Greek-owned ships flying the Liberian, Panamanian, and other "flags of convenience."

^d Excluding the Caspian Sea Fleet and tankers assigned to the Ministry of the Fishing Industry.

^e Including North Korean and Vietnamese vessels.

Index and Conversion Factors

	<i>Page</i>
Index	233-237
Conversion Factors	238

Index

- Acid, sulfuric 166
- Aggregate factor productivity, USSR 70
- Aggregate inflation rates, developed countries 7
- Aggregate inflation rate trends, LDCs 9
- Agricultural labor force 57
- Agricultural prices 51
- Agricultural production 44
- Aid, Soviet and East European economic extended to LDCs 14
- Aid, US economic loans and grants, to LDCs, by recipient 118-119
- Aircraft, civil, inventory 219
- Air freight 219
- Air passengers 218
- Aluminum, primary 156
- Ammonia, synthetic 165
- Arms transfers to non-Communist LDCs 127
- Automobiles, passenger, production 19, 179
- Average annual rates of growth in industrial production, by branch of industry, USSR 71
- Balance of payments, USSR 74
- Balance, trade, non-Communist countries 82-83
- Bauxite 150
- Big Seven exports by commodity 86-87
- Big Seven imports by commodity 88-89
- Big Seven trade 84-89
- Big Seven trade balance by commodity 90-91
- Bilateral capital flows to LDCs, gross 116
- Brown coal 140
- Burden, tax, industrial countries 12
- Buses, production 180
- Capital, fixed, stock of, USSR 69
- Capital flows to LDCs, total gross bilateral 116
- Capital, investment, gross fixed, USSR 68
- Cars, passenger production 179
- Cars, railroad freight 181
- Cattle 196
- Caustic soda 164
- Cement 24-25, 183
- Chemical fertilizer, nutrient content, consumption 204-208; production 167-170
- China, exports 25, 106-107
- China, imports 25, 106, 108
- Chinese, economic aid extended to LDCs 114
- Chinese, foreign trade 25, 106-108
- Chromite 149
- Civil aircraft, inventory 219
- Civilian trucks, inventory 223
- Coal, brown 140
- Coal, hard 139
- Coal, proved reserves 133
- Coarse grain 20, 191
- Cobalt 159
- Coffee 201
- Combines, grain 177
- Commercial vehicles, production 180
- Commodity production of the US and USSR 29-31
- Communist countries, economic aid to LDCs 111
- Communist countries, economic profile 25
- Communist countries, exchange rates 61
- Communist countries, exports 25, 98-99, 101-102, 104, 106-107, 109-110
- Communist countries, GNP 2, 4, 5, 6, 25, 34-35
- Communist countries, gross industrial production 25, 45-46
- Communist countries, imports 25, 98, 100, 101, 103, 105, 106, 108-110
- Communist countries, industrial production 25, 45-46
- Communist countries, military aid to LDCs 111
- Communist countries, military personnel from LDCs, trained in 122, 123
- Communist countries, Soviet economic aid 115
- Communist countries, trade, foreign (see Trade, foreign, Communist countries)
- Communist countries, training of LDCs academic, technical, and military trainees 126
- Communist countries, training of LDCs military personnel 122-123

Index (continued)

- Communist economic and military technicians in LDCs 124-125
- Construction, total housing 176
- Consumer price index 53
- Consumption, oil 24-25, 135
- Conversion factors 238
- Copper, refined 155
- Cotton, ginned 203
- Crude oil 134-137
- Crude oil, proved reserves 133
- Crude oil refining capacity 135
- Crude steel, production 18, 24-25, 152
- Cuba, Soviet economic assistance to 115
- Cuban foreign trade 109-110
- Currency, foreign, rates of exchange 61
- Debt, East European by source 48
- Debt, medium- and long-term, LDCs 49
- Defense expenditures, GNP, share of 47
- Deflators, price, GNP 36
- Developed countries, economic profile 24
- Developed countries' trade, foreign, direction of 78-91
- East European debt by source 48
- East European economic aid extended to LDCs 113
- Eastern Europe, exports 25, 101-102, 104
- Eastern Europe, foreign trade 25, 101-105
- Eastern Europe, foreign trade, direction 101-103
- Eastern Europe, imports 25, 101, 103, 105
- Economic aid (see Aid)
- Economic indicators, selected non-OPEC less developed countries 41
- Economic indicators for selected industrial countries 42-43
- Electricity generating capacity, installed 142-143
- Electric generators, production 175
- Electricity, production 141
- Energy 130-143
- Energy efficiency 16
- Energy, primary 130-132
- Energy, primary, consumption 131
- Energy, primary, production, by type 132
- Equipment, electricity generating 175
- Exchange rate equivalents, GNP 37
- Exchange rates, Communist countries 61
- Expenditures, defense, GNP, as a share 47
- Export prices 42-43, 92-93
- Exporters of oil 27, 136
- Exports, Big Seven 84-87
- Exports, Chinese 25, 106-107
- Exports, Cuba 109-110
- Exports, Eastern Europe 25, 101-102, 104
- Exports, non-Communist countries 78-79
- Exports, Soviet 25, 72-74, 98-99
- Factor productivity, USSR 70
- Factors, conversion 238
- Fertilizer, chemical, consumption 204-208
- Fertilizer, chemical, nutrient content production 167-170
- Fertilizer, nitrogen, consumption 206
- Fertilizer, nitrogen, production 168
- Fertilizer, phosphate, consumption 207
- Fertilizer, phosphate, production 169
- Fertilizer, potassium, consumption 208
- Fertilizer, potassium, production 170
- Fibers, synthetic 174
- Financial flows, net 117
- Fish catch 195
- Fishing fleet 230
- Fixed capital, stock of, USSR 69
- Fixed investment, gross, USSR 68
- Fleet, fishing 230
- Fleet, merchant 226-227
- Fleet, tanker 228-229
- Foreign trade (see Trade, foreign)
- Freight cars, railroad 181, 222
- Freight traffic, air 219
- Freight traffic, inland water 216-217
- Freight traffic, motor vehicle 214-215
- Freight traffic, ocean 218
- Freight traffic, railroad 212-213
- Freight traffic, truck 214-215
- Gas, natural 138
- Gas, natural, proved reserves 133
- Generating capacity, electricity, installed 142-143
- Generating capacity, nuclear, installed 143
- Ginned cotton 203
- GNP 2-6, 8, 22-28, 34-40, 64-67
- GNP, Communist countries 2-6, 25, 34-35, 38-40, 64-67
- GNP, defense expenditures as a share of 47
- GNP, deflators 36
- GNP, Eastern Europe 2, 25, 34-35, 39-40
- GNP, end use, US 38
- GNP, end use, USSR 38, 66
- GNP, exchange rate equivalents 37
- GNP, growth 5-6, 8, 39
- GNP, growth, per capita 40
- GNP, LDCs, aggregate real growth rates 8
- GNP, market prices 34-35
- GNP, per capita 2-3, 24-28
- GNP, price deflators 36
- GNP, purchasing power equivalents 37
- GNP, real comparisons 6

Index (continued)

- GNP, real, trends 5
- GNP, US 4, 6, 24, 34, 36, 38-39
- GNP, USSR 4, 6, 25, 35, 38-40, 66-67
- GNP, world 4, 22, 34
- Gold 75, 161
- Gold, USSR 75, 161
- Government receipts, outlays and balance as a share of GDP 11
- Grain combines 177
- Grain, coarse 20, 191
- Grain, total 188-189
- Grain, yields 209
- Gross fixed capital investment, USSR 68
- Gross industrial production index, Communist countries 25, 45, 70-71
- Gross official bilateral capital flows to LDCs 116
- Harbors accessible for fully loaded tankers 224-225
- Hard coal 139
- Hard currency, balance of payments, USSR 74
- Hard currency, debt to the West, USSR 75
- Hard currency trade, USSR 72-74
- Hogs 197
- Housing construction 176
- Hydroelectricity 141
- Import prices 42, 92-93
- Importers of oil 136-137
- Imports, Big Seven 84-85, 88-89
- Imports, Chinese 25, 106, 108
- Imports, Eastern Europe 25, 101, 103, 105
- Imports, non-Communist countries 26-28, 80-81
- Imports, Soviet 25, 72-74, 98, 100
- Industrial factor productivity, USSR 70
- Industrial employment 59
- Industrial production 24-25, 45-46, 66-67, 70-71
- Industrial production, average annual rates of growth, by branch, USSR 71
- Industrial production index, Communist countries 24-25, 45-46, 66-67, 70-71
- Inflation rate trends 7, 9
- Inland water freight traffic 216-217
- Installed electricity generating capacity 142-143
- Interest rates, major industrial countries 13
- International economic comparisons, selected countries 6, 24-28
- Investment, gross fixed capital, USSR 68
- Iron ore 146
- Iron, pig 151
- Labor force 56-58
- Labor force, agricultural 57
- Labor force, nonagricultural 58
- LDCs, aggregate inflation rates 9
- LDCs, aggregate real GNP growth rates 8
- LDCs, aid (see Aid)
- LDCs, arms transfers 127
- LDCs, economic profile, selected 26-28
- LDCs, official bilateral capital flows to 116
- LDCs, medium- and long-term debt, selected 49
- LDCs, non-OPEC, economic indicators 41
- LDCs, non-OPEC, export and import prices and terms of trade 92-93
- Lead, smelter 157
- Lignite 140
- Locomotives, mainline, inventory 221
- Machine tools 176-177
- Magnesium, primary 161
- Mainline locomotives, inventory 221
- Manganese ore 147
- Meat 198
- Merchant fleet, inventory 226-227
- Metalcutting machine tools 176
- Metallforming machine tools 177
- Metal prices 50
- Military personnel from LDCs trained in Communist countries 122-123
- Milk 199
- Mineral imports as a share of consumption 1985 17
- Molybdenum 162
- Motor vehicle freight 214-215
- Natural gas production 138
- Natural gas, proved reserves 133
- Natural rubber 171
- Net financial flows 117
- Newly industrialized nations 28
- Newly industrialized nations, trade with Big Seven 94
- Newsprint 184
- Nickel, refined 154
- Nitrogen fertilizer, consumption 206
- Nitrogen fertilizer, production 168
- Nonagricultural labor force 58
- Non-Communist countries, exports 78-79
- Non-Communist countries, imports 80-81
- Non-Communist countries, oil import bill 96
- Non-Communist countries, trade balance 82-83
- Non-OPEC, economic indicators 41
- Non-OPEC LDCs, export and import prices and terms of trade 92-93
- Nuclear electricity generating capacity 143
- Ocean freight traffic 218
- Oil, consumption 24-25, 135

Index (continued)

- Oil, crude 27, 132-137
- Oil, crude production 27, 134
- Oil, crude, proved reserves 133
- Oil, crude refining capacity 135
- Oil, exporters 27, 136
- Oil, import bill, selected countries 96
- Oil, imports 136
- Oil, prices 52
- Oil, export revenues 27, 95
- Oil, trade 136-137
- OPEC, economic profile 27
- Ore, iron 146
- Ore, manganese 147
- Ore, tungsten 148
- Organization of Petroleum Exporting Countries, economic profile 27
- Paper 184
- Passenger automobiles, production 19, 30, 179
- Passenger traffic, air 218
- Petroleum pipeline transportation 220
- Phosphate fertilizer, consumption 207
- Phosphate fertilizer, production 169
- Pig iron 151
- Pipeline transportation, petroleum 220
- Plastics 171
- Platinum-group metals 162
- Plywood 185
- Population 4, 22-28, 54-55
- Ports, offloading 224-225
- Potassium fertilizer, consumption 208
- Potassium fertilizer, production 170
- Potatoes 193
